A beautiful, magical preview. I'm really looking forward to the full content!. Okay, this game is very simple. Basically, you just walk straight, sometimes look right or left and switch your broken flashlight on every few seconds. There are some strange creatures that do haunt you and move in for the kill (jump scare scene that shows game over).

There are like 7 or 8 levels when you must go forward to the staircase that leads you down to the next level. The aforementioned flashlight is your only weapon for defending yourself. Well, defending means more like "stunning" those strange Sesame Street-like creatures that haunt you for some seconds.

Well, I've only played this game for so long because I do like a good night's sleep:)

Some cons to overall good game:

- controls are somewhat stiff
- you need to be somewhat precisely positioned to look left or right into a corridor, but stiff controls make this one a bit hard

So, if you like scary games similar to Five Nights at Freddy's or this SCP 87 staircase game then you may give 123 Slaughter Me Street a try. It's simple and it's scary if you play it alone at night.. Bought this because I played the original Deathtrack back in the 80's. Had way more fun then. Handling of cars are dreadful.. This game puts you inside a voxel-style environment in which you can simply play Ping Pong in VR. The physics are great. The retro style is cool, as is the music and sound effects, making it a truly immersive game. There are also seven other game modes aside from the main game that you can play, some of them seem a little tricky though for the average player so may not see as much replay as the main game, especially for those that aren't particularly skilled at Ping Pong. There are apparently also Easter eggs to find... I would have liked some sort of multiplayer mode though as I think this would be a great game to play with others. (I also find that it is difficult to serve in this game but this could just be me...) Maybe a tad overpriced for a simple ping pong game, but overall a fun and enjoyable game for those looking to casually play Ping Pong in VR.

<https://youtu.be/rROjkuZOqAs>. Solid title with numerous choices to make that lead to multiple endings.. I am not an arcade guy. The destruction feeling was great. I loved the ultimately high tempo and time limit instead of health-bar is an incredible idea. The last boss... Endless tries and finally worth the challenge. Congratulations Aussie mates, waiting for the sequel already .)). Hey, guys. I'm downloading Windows 10 today. Please install me. Thanx. Seeya, James. Put in 98 mins. in this game and I LOVE IT I am A huge fan of Trials from the flash games to the recent games this is a must buy to any trials fan. Might not be as great as the others in series this game is great. Recommend this to any fan or new players to trials.

You asked for ratings for the game. Here you go. Its shovelware that uses free art found on the web. Its a short game, what you see in the trailer is what you get. There are no other environments. Did you mess up publisher and developer? Game page says its developed by BUG and published by Ora, but in game it says its developed by Ora.

Its setup like a mobile game. You're rewarded for coming back day after day. You can pay cherries to bypass levels. The levels get stupid with frogs and spikes. The levels are tiny collectathons. Get the gems to unlock the exit.

Real problems I have with the game are jump of faiths. There's too many of them and I'll fall below the camera. The camera is too fast. Look down it shoots down, turn right, it shoots right, turn left, it shoots left. Having to push W on the keyboard is annoying. Sometimes I can land on an enemy to kill them other times they hurt me. The same enemy. Enemies jump out from behind trees. This leads to enemies hitting me.

If you have to buy this game its \$1 cheaper on Microsoft's store and free on Android with ads. It will just be in a bundle like all the others from the developer. How long until this game is kicked off Steam like your others?. I do not believe that their is enough content in this game to justify the price they are charging for it.. Hi there! I got this game as part of a Humble Bundle offer and just thought I'd have a quick look at it to check it out with no real intention of playing (these days I play short quick fix games) however 100 hours of game play later I have completed the game with a suitable ending (there are many ways to finish). I think that should let you know what a compelling and absorbing experience Avadon 2 is.. I dont give a piece of crap if theres no multiplayer...this game deserves a thumbs up for itys ahead-of-its-time gameplay and graphics and no nonsense campaign for single player....especially on sale. Drive tanks, humvees, helis, fly drones, snipe, do it all in any order you want. Great game...no bugs.

\$5 on sale people.

Buy it, and enjoy it.. Not going to go through the whole good and bad thing. The game appears to be abandoned at this point.
